Example: Waymate developed by Oleksandr Bandyliuk.

Description

Holiday trip? Business trip? Outdoor weekend? Waymate is a travel checklist that you need! The app comes with 500+ pre-loaded items that can cover almost 90% of trip needs.

Privacy

The application only stores one variable in iCloud related to the date of activation of the app. The other data is stored in a user device only. The developer doesn't have access to any bit of user data. For any changes that materially alter user privacy rights, we will provide additional notice in the Waymate app.

Features

- Checklists reminders
- Checklists local items
- Catalog groups
- Checklists duplication
- Baggage information
- Passport information
- Checklists items, notes, and quantities

The business model of the application

The application is using a freemium business model. The users pay nothing to download the app and is offered optional in-app purchase for premium features.
